4. EMOTIONS: BEFORE / AFTER

SkillWallet | Data Analytics with Tableau Capstone

Project detail	Confirmed information
Documentation date	27 October 2026
Final submission date	28 October 2026
Project name	Electric Vehicle Market Performance & Insights
Tableau workbook	Electric Vehicle Market & Technology Analysis
Team ID	LMP-EV-2026
Project owner	Yuvraj Shrivastava
Enrollment number	EN25CS3011105
Institution	Medicaps University, Indore
Contribution	Individual project completed by Yuvraj Shrivastava

Activity 1: Interactive and visually appealing dashboard

The project dashboard, titled “EV Market Performance & Strategy Dashboard”, is built in Tableau. It presents an overview of electric-vehicle market performance through interactive visualizations, KPI summaries, filters and worksheet interactions. The dashboard is published through Tableau Public and embedded in the project website.

• **Clear and intuitive layout:** The dashboard groups the KPI summary and analytical charts so viewers can scan market performance and then explore specific dimensions.

• **Appropriate visualizations:** Bar chart, treemap, pie chart, map, scatter plot, dual-axis combination chart and highlight-table matrix are used for different analytical questions.

• **Colour and theming:** A consistent visual palette distinguishes categories and battery chemistries. Labels and legends support interpretation.

• **Interactive filters:** Global filters are provided for model_year, category, battery_type and manufacturing_country.

• **Cross-filtering:** Use as Filter actions allow selections in one view to filter related views.

• **Responsive publication:** The Tableau visualization is embedded in a responsive project website. The dashboard itself should be checked on desktop and mobile screen sizes.

• **Visual hierarchy:** The executive KPI summary is positioned as a quick market overview, with detailed charts supporting deeper exploration.

• **Overall market scale:** The Executive Summary screenshot reports annual sales of approximately 1,550.70M units, average price of approximately USD 64.92K, average range of 325 km and average customer rating of 4. The screenshot also contains a distinct-vehicle KPI, but its value is not legible in the supplied evidence.

• **Category sales:** The Category Sales chart ranks Two-Wheeler Scooter highest at approximately 174.6M annual sales units. Electric Bus is the lowest category in the displayed ranking at approximately 10M.

• **Battery technology share:** The Battery Tech Share pie labels NMC at 33.80%, LFP at 31.99%, NCA at 17.23% and Sodium-Ion at 9.88%. Solid-State represents the remaining share, approximately 7.10% based on the displayed rounded percentages.

• **Median range:** The Battery Performance chart shows Sodium-Ion with the highest median range at 341 km. LFP is 337 km, while NCA, NMC and Solid-State are each shown at approximately 338 km.

• **Price and range:** The scatter plot shows variation in average price and range across categories. Electric Bus and Electric Truck appear at high price levels, while several smaller vehicle categories occupy lower price and range positions.

• **Manufacturing footprint:** The Global Manufacturing Map highlights country-level annual sales. China is labelled at 158,514,269 annual sales units in the supplied map screenshot.

• **Battery-country mix:** The Country vs Battery Matrix compares vehicle counts across five battery types and ten manufacturing countries, helping identify differences in battery mix by country.

Activity 2: Tableau Public and website links

Tableau Public workbook:
https://public.tableau.com/views/ElectricVechileMarketTechnologyAnalysis/ElectricVehicleMarketPerformanceInsights?:showVizHome=no

Live project website: https://en25cs3011105-spec.github.io/Electric-Vehicle-Market-Performance-and-Insights/

The dashboard is embedded in the website. The Story is not described as fully complete: only Story Point 1 has been completed.

Evidence required

Attach a full dashboard screenshot showing the KPI area, charts and filters. If possible, include one screenshot after applying a filter to demonstrate interactivity.
