4. EMOTIONS: BEFORE / AFTER

SkillWallet | Data Analytics with Tableau Capstone

Project detail	Confirmed information
Documentation date	27 October 2026
Final submission date	28 October 2026
Project name	Electric Vehicle Market Performance & Insights
Tableau workbook	Electric Vehicle Market & Technology Analysis
Team ID	LMP-EV-2026
Project owner	Yuvraj Shrivastava
Enrollment number	EN25CS3011105
Institution	Medicaps University, Indore
Contribution	Individual project completed by Yuvraj Shrivastava

Story purpose

A Tableau Story arranges visualizations and explanatory text into a sequence that guides an audience through analysis. For this project, the planned narrative is “Strategic Insights: Global EV Market & Battery Technology”. Only Story Point 1 is completed as confirmed by the project owner.

Story structure and completion status

Story point	Planned focus	Visual content	Status
1. Global EV Market & OEM Overview	Compare category demand and manufacturer sales contribution.	Category Sales and Manufacturer Share treemap.	Completed
2. Battery Chemistry & Range Breakthroughs	Compare adoption, median range and production mix.	Battery Performance, Battery Tech Share and Country vs Battery Matrix.	Planned, not completed
3. Pricing Efficiency & Customer Satisfaction	Explore price-range positioning and customer ratings.	Price vs Range and Rating vs Battery.	Planned, not completed
4. Global Manufacturing Footprint & Recommendations	Review geographic concentration and formulate strategic implications for the hypothetical persona Emily Johnson.	Global Manufacturing Map and evidence-based recommendations.	Planned, not completed

Completed Story Point 1: Global EV Market & OEM Overview

Story Point 1 introduces the market through category sales and manufacturer contribution. The Category Sales worksheet ranks annual sales units by vehicle category, while the Manufacturer Share treemap compares manufacturers by annual sales units. The two views provide an initial picture of where demand is concentrated and which manufacturers have larger sales footprints.

• **Interpretation:** The supplied Category Sales screenshot places Two-Wheeler Scooter at the top of the category ranking, with Electric Bus at the bottom.

Planned future story points

• **2. Battery Chemistry & Range Breakthroughs:** Compare adoption, median range and production mix. Visuals: Battery Performance, Battery Tech Share and Country vs Battery Matrix.. This point is not yet completed.

• **3. Pricing Efficiency & Customer Satisfaction:** Explore price-range positioning and customer ratings. Visuals: Price vs Range and Rating vs Battery.. This point is not yet completed.

• **4. Global Manufacturing Footprint & Recommendations:** Review geographic concentration and formulate strategic implications for the hypothetical persona Emily Johnson. Visuals: Global Manufacturing Map and evidence-based recommendations.. This point is not yet completed.

Persona and recommendation framing

Emily Johnson is a hypothetical customer persona used to frame the final strategic recommendations. She is not a real customer and no actual interview or customer research with her is claimed. Recommendations for this persona should be completed only after Story Points 2–4 are built and the relevant charts are reviewed.

Story publication

Tableau Public workbook:
https://public.tableau.com/views/ElectricVechileMarketTechnologyAnalysis/ElectricVehicleMarketPerformanceInsights?:showVizHome=no

A separate public Story URL has not been provided. Since only Story Point 1 is complete, this document does not claim that the four-point Story is finished or publicly published.
