Ideation Phase

Brainstorm & Idea Prioritization Template

Date	27 October 2026
Team ID	LMP-EV-2026
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Individual project declaration: This project was completed independently by Yuvraj Shrivastava. He independently performed ideation, dataset cleaning and review, Tableau worksheet and dashboard creation, completion of Story Point 1, and website publication. Story Points 2-4 remain planned and were not completed as of 27 October 2026. No other person was involved as a project contributor.

Brainstorm & Idea Prioritization Template:

Brainstorming is a creative problem-solving process. For this individual project, Yuvraj Shrivastava independently generated, organized and evaluated the ideas recorded below.

Step 1: Brainstorm and Idea Listing

The sole contributor lists possible ideas before evaluating and prioritizing them.

S.No	Contributor	Idea / Suggestion	Category	Group No.
1	Yuvraj Shrivastava (Sole Contributor)	Develop an executive EV market dashboard showing annual sales, average price, average driving range and customer rating, with category and country-level exploration.	Dashboard & KPI analytics	1
2	Yuvraj Shrivastava (Sole Contributor)	Compare EV category sales and manufacturer contribution using a descending horizontal bar chart and a manufacturer sales treemap.	Market segmentation & OEM analysis	1
3	Yuvraj Shrivastava (Sole Contributor)	Compare five battery chemistries through median range, adoption share and a country-versus-battery vehicle-count matrix.	Battery technology analysis	2
4	Yuvraj Shrivastava (Sole Contributor)	Explore product positioning and geographic performance using price-versus-range, rating-versus-battery-capacity and global manufacturing visuals.	Product & geographic analysis	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Integrated EV market dashboard: executive KPI summary, category sales, manufacturer sales treemap and interactive exploration.	High	High	1 - Highest	Yes
2	Battery technology comparison: battery-tech share, median range by chemistry and country-versus-battery matrix.	High	High	2 - High	Yes
3	EV product and geography analysis: price-versus-range scatter, rating-versus-battery-capacity combo chart and manufacturing map.	High	High	3 - High	Yes

Data preparation confirmed by the project owner: null values and duplicate records were removed, and data types were corrected before analysis. The ev_market_train.csv file was used as the Tableau data source. The supplied ev_market_test.csv file was retained as a project resource but was not connected to the Tableau workbook.

Project evidence used for prioritization

The supplied Tableau screenshots show the dashboard and the nine worksheet tabs: (1) Executive Summary, (2) Category Sales, (3) Manufacturer Share (Treemap), (4) Battery Performance, (5) Battery Tech Share, (6) Global Manufacturing Map, (7) Price vs Range, (8) Rating vs Battery, and (9) Country vs Battery Matrix. The supplied Excel screenshot shows ev_market_train.csv with sample records and visible fields including vehicle_id, model_name, manufacturer, model_year, manufacturing_country, market_region, category, battery_capacity_kwh and battery_type.

All four brainstorm ideas listed above were generated and recorded by Yuvraj Shrivastava independently. No other team member or contributor was involved. The prioritization reflects the project deliverables completed by the sole contributor.

Appendix A. Tableau and Dataset Evidence

The screenshots below provide visual evidence of the independently completed Tableau workbook, dashboard, Story Point 1, nine worksheet views, and the sample training dataset. Only Story Point 1 is completed; Story Points 2-4 remain future work.

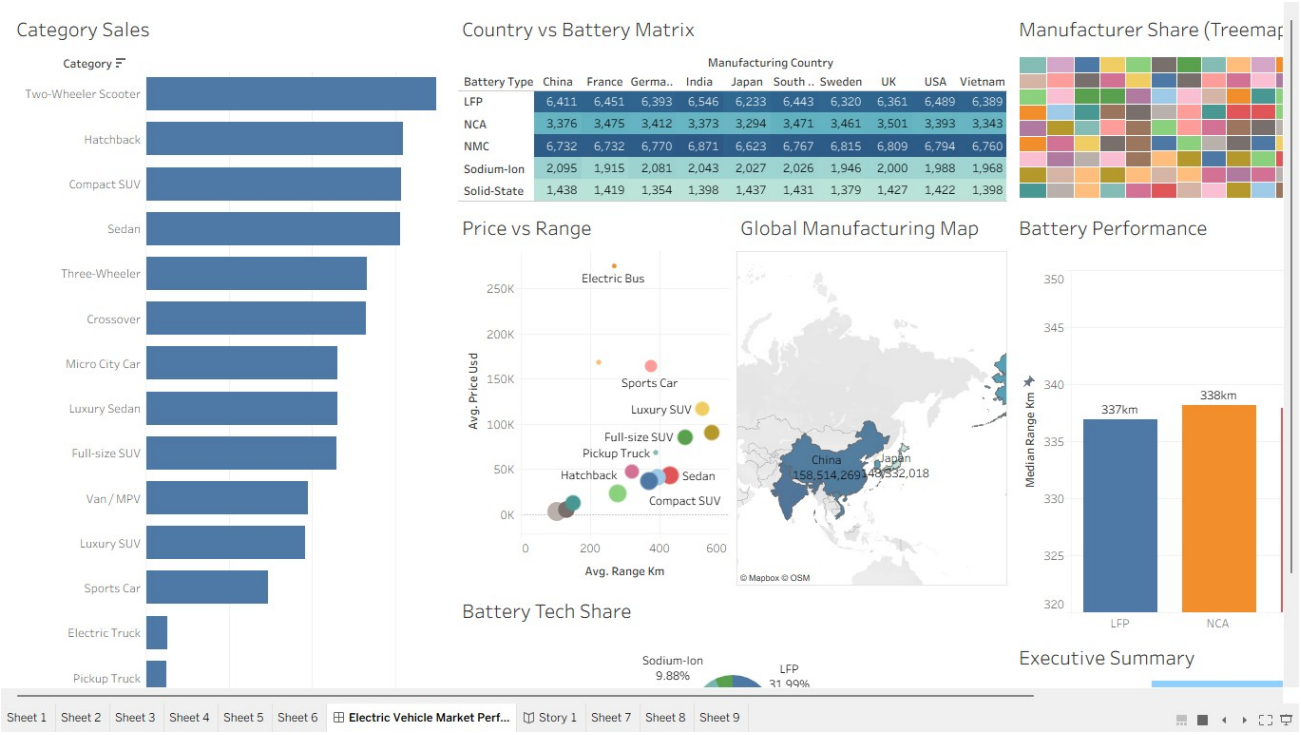

Figure A1. Tableau dashboard overview showing category sales, country-versus-battery matrix, manufacturer treemap, price-versus-range view, global manufacturing map and battery performance.

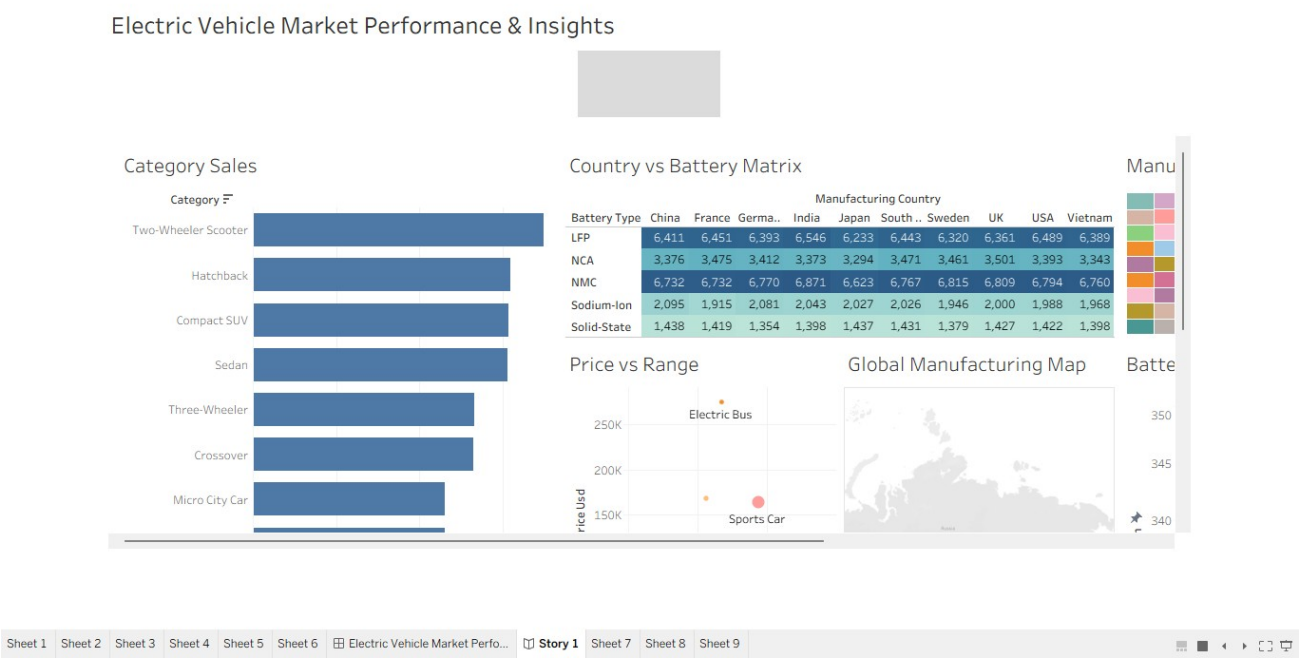

Figure A2. Tableau Story screenshot showing the completed Story Point 1, Global EV Market & OEM Overview. Story Points 2-4 are planned and have not yet been completed.

Figure A3. Executive Summary worksheet showing the displayed annual sales, average price, average range and average customer rating KPIs.

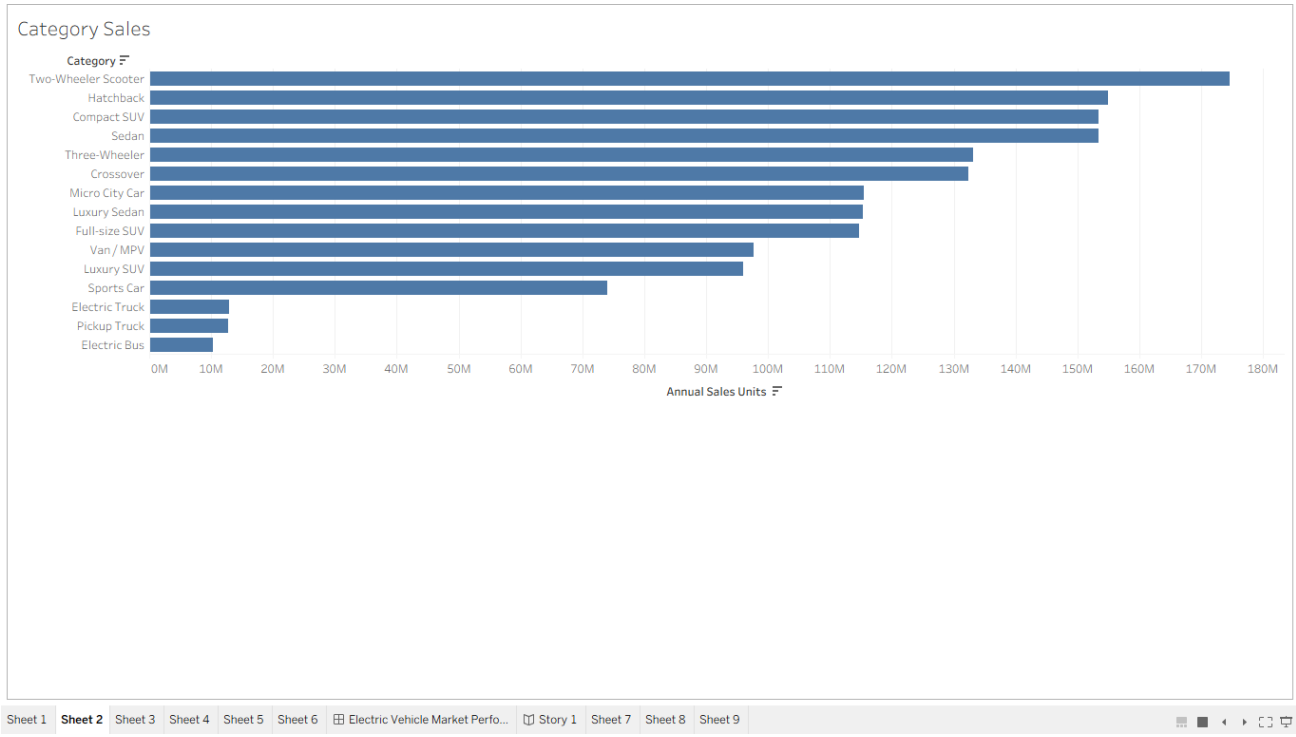

Figure A4. Category Sales worksheet, a horizontal bar chart comparing annual sales units across EV categories.

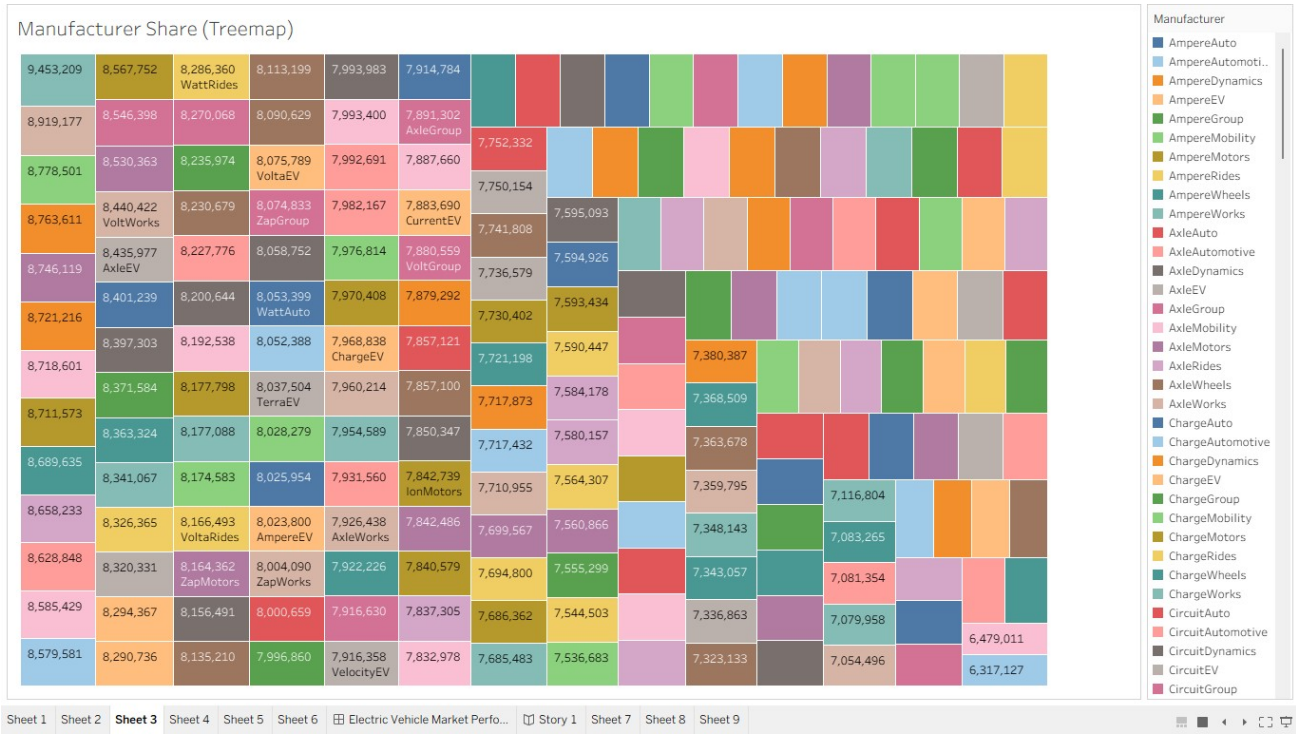

Figure A5. Manufacturer Share (Treemap) worksheet, using tile size and color to show manufacturer-level sales contribution.

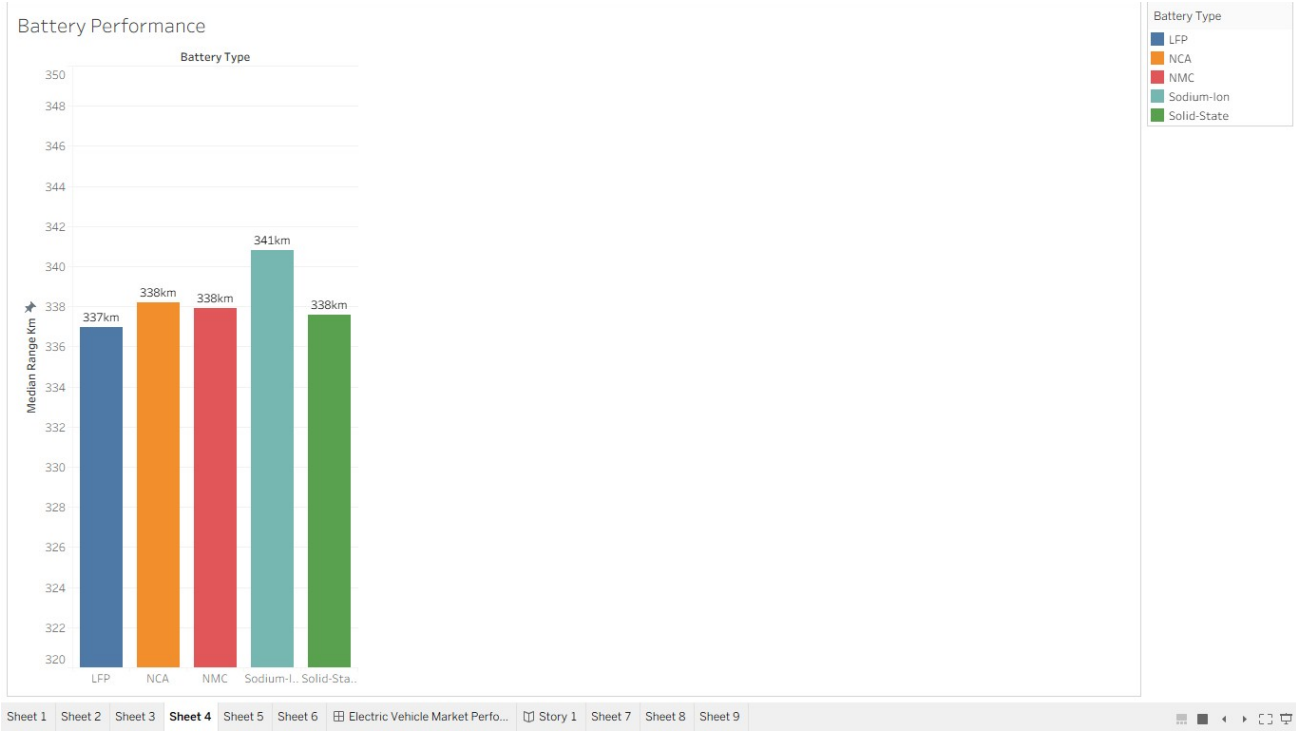

Figure A6. Battery Performance worksheet showing median range values for LFP, NCA, NMC, Sodium-Ion and Solid-State batteries.

Figure A7. Battery Tech Share worksheet showing the displayed percentage mix for battery technologies.

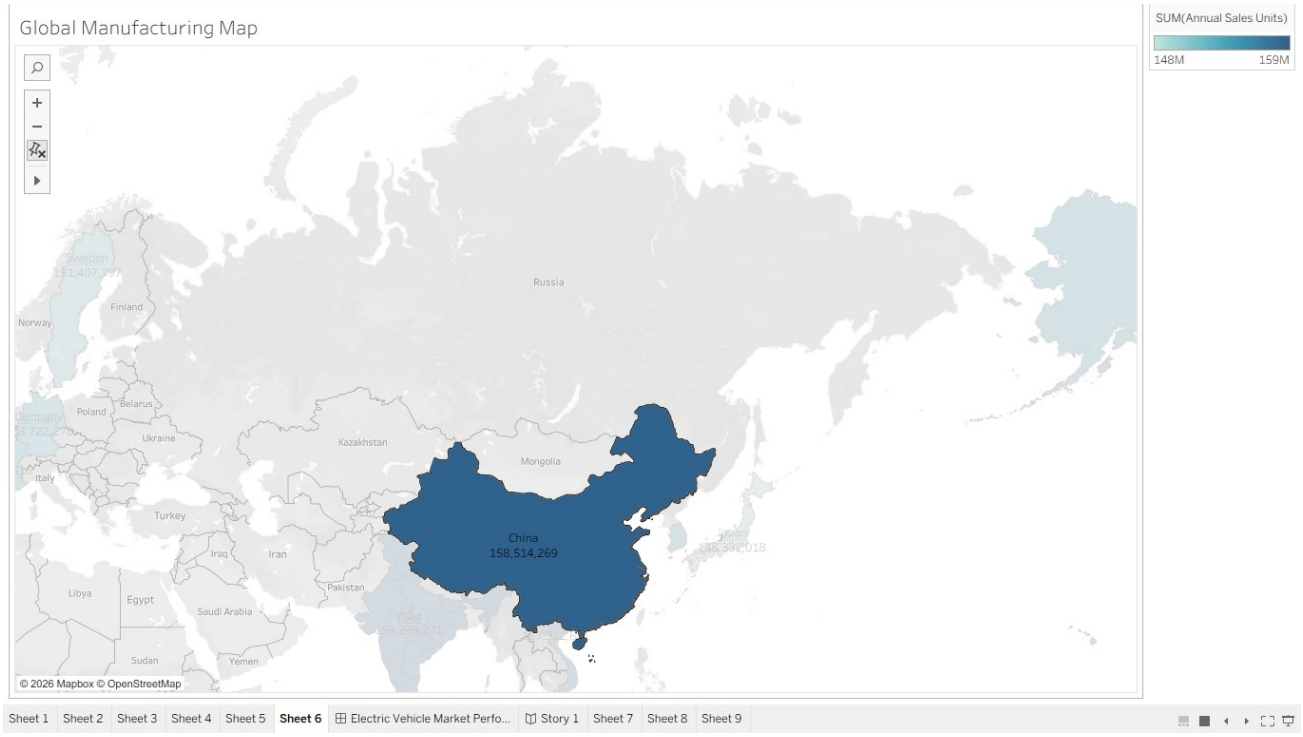

Figure A8. Global Manufacturing Map worksheet, showing geographic sales distribution by manufacturing country.

Figure A9. Price vs Range worksheet, comparing average vehicle range and average price by category.

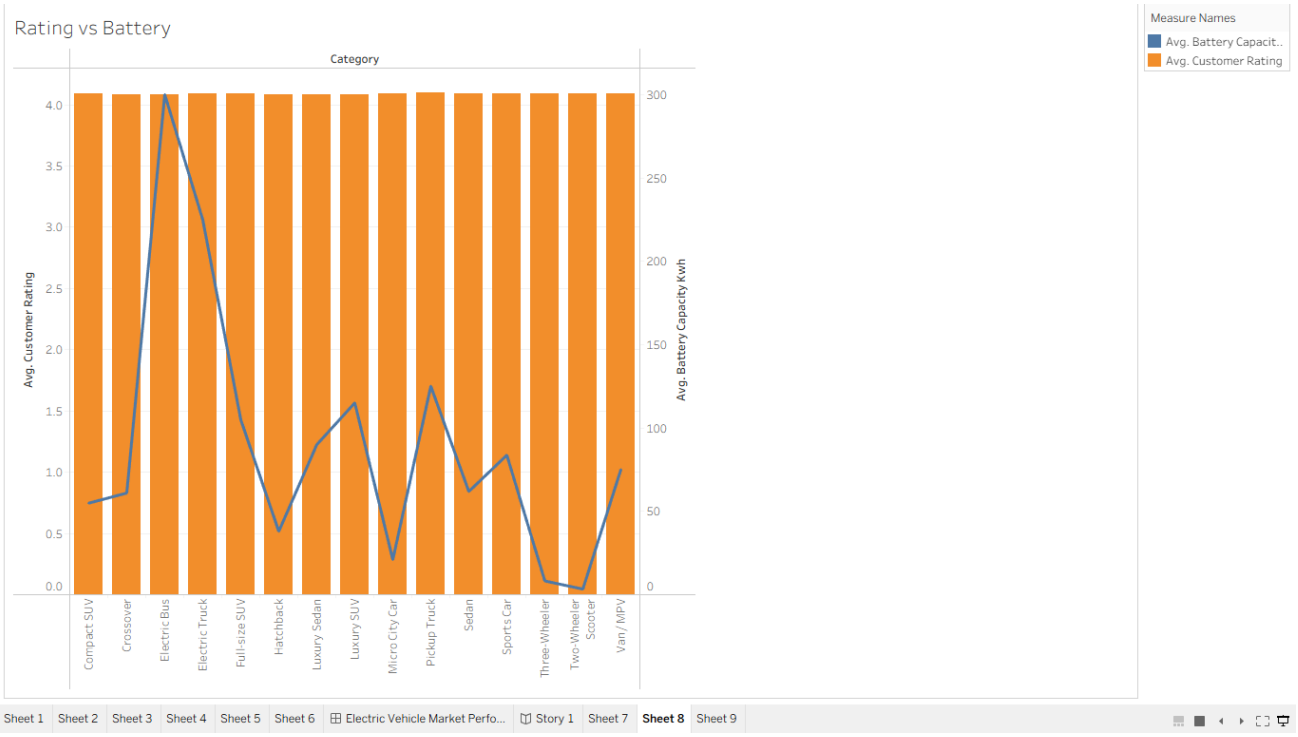

Figure A10. Rating vs Battery worksheet, displaying customer rating bars and a battery-capacity line by vehicle category.

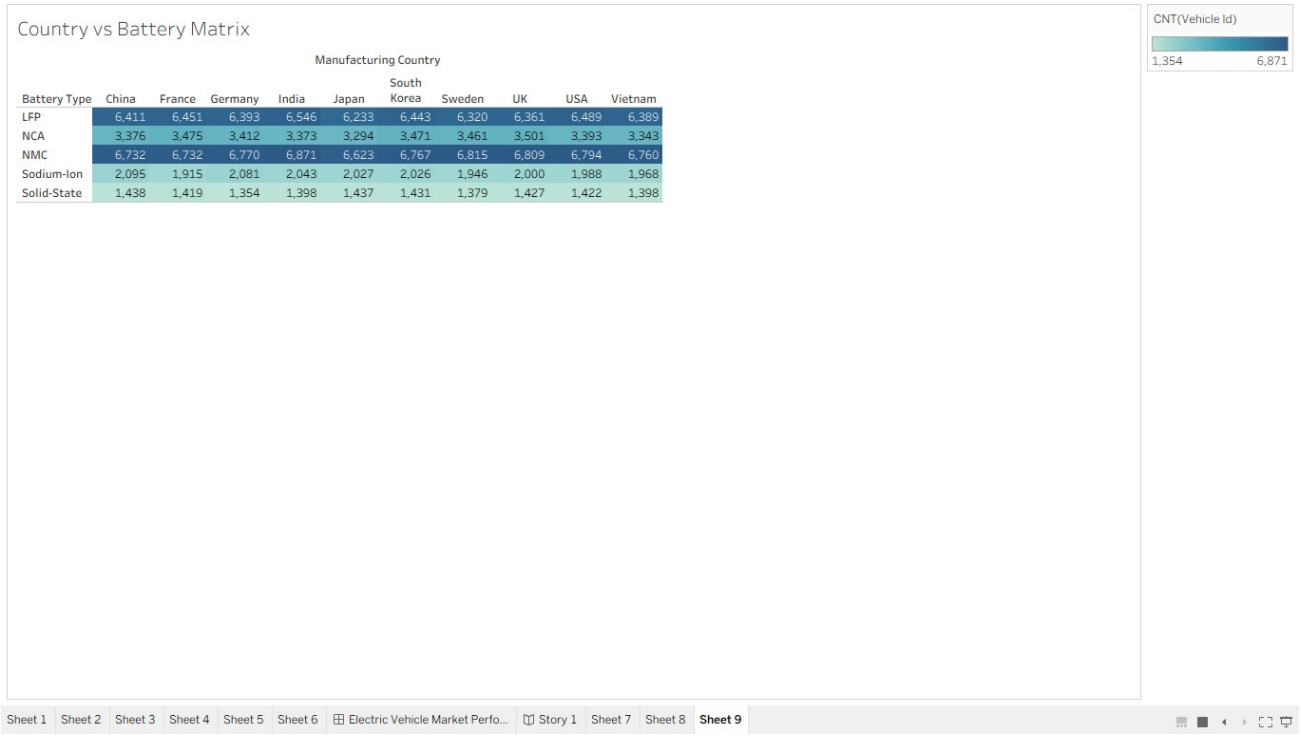

Figure A11. Country vs Battery Matrix worksheet, comparing vehicle counts across battery types and manufacturing countries.

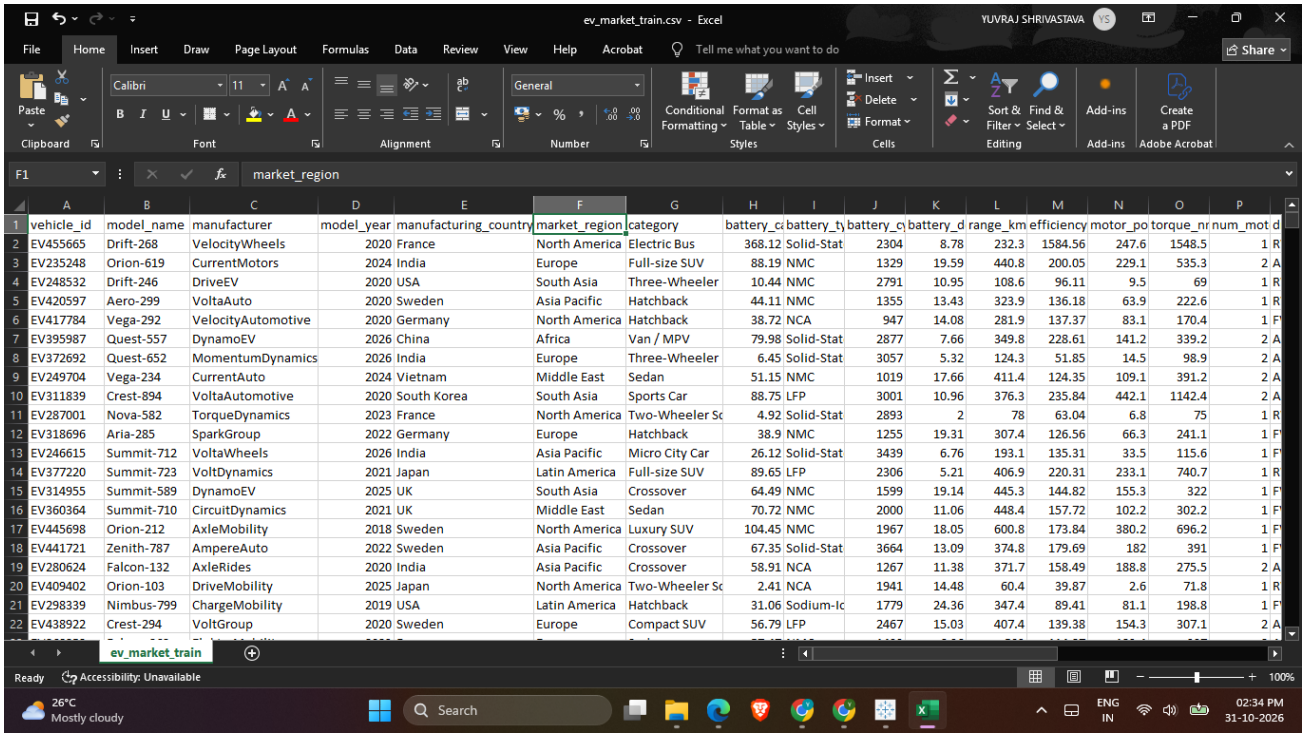

Figure A12. Excel screenshot of ev_market_train.csv, showing sample records and visible dataset fields. It is a sample view, not a complete schema listing.
